The Circulation of The Bulletin

The Bulletin has the largest circulation of any paper in Eastern Connecticut and from three to four times larger than that of any in Norwich. It is delivered to ever 3,000 of the 4,053 houses in Nerwich, and read by ninetythree per cent. of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100 and in all of these places it is considered the local daily.

Eastern Connecticut has fortynine towns, one hundred and sixty-five postoffice districts, and sixty rural free delivery

The Bulletin is sold in every town and on all of the R. F. D. routes in Eas . Connecticut.

FIREPROOF CONSTRUCTION.

The destruction by fire of a dormitory at the Connecticut Agricultural college calls attention to the necessity of giving proper consideration to the matter of firepreof construction for such institutional buildings. The building was not a new one, having been erected nearly a quarter of a century age when fireproof construction was given less attention than today, but the wisdom of guarding against such loss, even though insured, and keeping the fire menace at the minimum is apparent. Not only was the dor-mitory burnable, but while afire it most

to the location, the lives which may be threatened, property loss and the important matter of prevention Noth. ing serves to meet all these important considerations like fireproof construction. It not only gives a permanency to the buildings, but it contributes that element of safety both within and without which is so greatly desired. The institution is a fixture and the buildings should be,

PROFIT SHARING.

There have been many excellent firmly convinced of the central by examples of profit sharing and reward- idea with New York as the center. ing of faithful service by manufacturing concerns in the present and in elaborate and extensive plans which have been announced by Henry Ford the eggs. of automobile fame, when it is planned to distribute about half the earnings of the company among the employes during the ensuing year. This means that there will be one of the greatest fort between employer and employe, in which the greatest cause for rejoicing lies in the fact that it is voluntary. The ten million which it is expected a back number, will be distributed will be received through increased pay, not a male employe receiving less than five dollars a day, and the reduction in the hours of labor. Such an effort should result in the establishment of ideal rebetween the capital and labor

there interested. This great plan of profit sharing is ping to be watched with a great deal of interest. It is made possible by the great growth of the concern and is based upon the expectations that it will continue to be favored with at fragettes as a pace maker. as in the past. It is a step which calls for deserving praise and it is to be Brazil or stays in Mexico, it is not stead hoped that nothing will prevent the likely to have much effect upon the said: carrying out of all the details of the policy of "watchful waiting." plan. It is an instance where other concerns might like to do likewise, but lack the wherewith. However, having the wealth and the inclination it is to the credit of the company that this action is to be taken.

SIR LIONEL CARDEN.

The change of the minister to Mexto from Great Britain, Sir Lionel if not immodest pleasures. Carden, to a post in Brazil may be in the nature of a promotion to this official, but it creates a vacancy which is not likely to be filled by an ap-Carden. It is from the attitude which he has maintained relative to the polof this country in Mexico that his promotion is evidently due. His early declarations and criticisms of the position taken by this country created the semblance of sympathy with properly equipped to overcome them. Huerta's cause by Great Britain which tion. It brought forth disavowals and

it may have been.

Now that the affair has passed over state or national regulations. his government changes his post. It isn't to be supposed that it is because of his excellent diplomatic service in Mexico that he is selected for a high- eats of all New England in insisting er place. If he has been so valuable upon the separation of the New Hathere he would naturally he retained, ven and all its subsidiaries. The sit-Facts seems to bear out the belief that Sir Lionel is being moved because of of any of them even though it is not his indiscretion. It is an action on apparent how any improvement is to the past of Great Britain which indi- be gained by the demanded change. I measure of self-protection, is the sub- sin against the soul; that man that

cates a desire to support the policy of this country. It means that the interests of Great Britain will be well cared for by his successor, that Huerta will lose a strong sympathizer and that Great Britain will have displayed an unmistakable friendly attitude to this country and its Mexican policy.

GREATER RESPONSIBILITY.

Within a brief period three people have been killed in cities of this state while automobiles were passing electric cars which were stopped for the convenience of patrons. These are not the only instances of deaths from auto accidents, but they are cases which indicate too plainly the absence of a proper regard and respect for human life. In none of these cases were the auto drivers proceeding with reckless speed, but they insisted upon proceeding where other vehicle travel would sake house occupied by the good Samaritans. Within a brief period three people ing where other vehicle travel would have stopped and avoided the people who were struck. Such instances reveal the responsibility which every driver of an automobile must assume even though he may be within the letter of the law. The large number of deaths from auto accidents send up an emphatic demand for it. It is important that the public should be recognized. ing where other vehicle travel would | Samaritans. emphatic demand for it. It is important that the public should be recognized as to their existing rights and privileges. There has been much automobile legislation but indications point to more before there will be less. In holding a Bridgeport chauffeur criminally responsible for the death of a child although giving him credit for handling his machine skillfully and efficiently the coroner holds that "common prudence should have forbidden him to drive his machine towards an important street crossing where much

of eight miles an hour." is this demand that greater re sponsibility be realized by the drivers of motor cars which must be met if accidents and fatalities are going to

PAY TEACHERS TO STUDY

diminish instead of increase.

anguage instruction in our best schools | mistress! is as good as that abroad in proporils to begin the study of a foreign language under competent instruction in the grades and the colleges should give special attention to preparing teachers of modern languages."

The position which is taken by Dr. is one which considers solely modern language instruction and it is doubtless true as he states that all knows everything about birds, fish, methods have some good features and insects and animals." that nearly everything depends upon the teacher. The worst of a dozen methods employed by a strong teacher with underlying purpose well in mind, will give a more valuable training and better results than any method when employed by an inferior teacher.

"Does he board with some old woman who holds the cats and dogs "No "no I "He has a cottage of his own down near the water. Pa and I know him well, and I'll take you down there some day, if you wish. His collection is well worth seeing."

THE REFORMER

It was a case of hay fever and the doctor said that Miss Cressy Fairbanks must spend two weeks in the country.

Miss Cressy declared that she'd die first. The doctor recommended a quiet village on Long Island. Miss Cressy said she'd drown herself in the Sound. He knew of a nice old couple that would take her in and make a pet of her. She would make it so hot for that nice old couple that they would wish they had never set eyes on her! However and nevertheless, Miss Cressy duly arrived at the quiet village speken of, and was also duly installed in the quaint but very comfortable house occupied by the good Samaritans.

When it comes to a shortness of breath—when it comes to talking the English language through that nose—when the eyes water and there is need of a small boy to follow one around with a bundle of handkerchiefs, why,

pedestrian travel might be expected bangs."

"Any ball here for Biss Gressy Fair-bangs."

of course, and the postmistress ought to have known it was, but she made Miss Cressy try three different times and then said there was nothing for Miss Fairbangs. The cold glare she got in reply gave her chills for a week. As Miss Cressy started homewards she encountered a young man. It may be added that he also encountered her. He had heard that there was a good-According to the opinion of W.

ye have done it unto me." He "Inasmuch as ye have DONE IT

castaway sprang out and sank down on solid ground. Had she spited Mr. Blair? She wasn't two minutes deciding that she hadn't. He was off somewhere catching grasshoppers, and she was cast away on an island where bull thistles and blackberry bushes were thicker than fleas on a dog. She would be missed, but it might be a day or two before the searchers found her.

Miss Creasy wept. She was weeping when she saw a boat approaching the island. It was a rowboat, and oars were being handled by a man. was a man who was in no hurry was a man who was in no hurry. The boat was headed straight for her, as if she had been seen from the shore though a glass, but the carsman was taking his time to get there. Sometimes he ceased rowing entirely for two or three minutes. However, he drew near enough at last for the castaway to recognize him and to spring to her feet and exclaim: "Tis he! "Tis Mr. Blair!"

So it was, but no earthquake followed. In a leisurely way, as if he were searching for a toadstool, he landed and sat down and did not heed her presence in the slightest. She stood it for a long minute and then transferred by exclaimed.

impatiently exclaimed: "Well, sir!"
"Well, miss!"

She made no answer,
"Did you hope to cure your snob-bishness at the same time!"

bishness at the same time!"

She caught her breath with a rasping sound, and her fingers clenched.

"The villagers wanted to meet you and greet you but you antagonized them at once. You evidently consider them a lot of pumpkin-heads because they live in a village, but you make a great mistake. And who are you to glare and snub?"

"I—!!" she stammered, as she choked up.

Distributors for Connecticut

New Haven, Connecticut They il be ries exact a stick at law that the truth? what it's just the other way. The fittest—that ig, the bracest, strongest and most of all th' at tell th' rican tax— The unfit, the diseased, the thin blooded, stop at home. These propa—

rate the human race.

This is devilution. As David Starr Joffian says: "In the red field of human history the natural process of selection is often reversed."

It is the triumph of unreason.

The chief empittion of living men

The chief ambition of living should be that the next and the next generation should be better and better. What ought one to think, then, of a condition of society where the soundest and healthiest bodies are enarated from the mass and led out to death? Yet such for centuries has been the practice in Europe. What would one think of a gardener who pulled up all the thriving plants from his garden and saved the sickly mes for seed?

The Workmen's Compensation Act appears to have been very poorly framed. It is capable of several con-structions but in spite of this the gen-eral underlying principle is a good one, calculated to relieve the burden of the working man injured while at his employment.—Bridgeport Standard.

Derby's traffic officer, who is to be permanently stationed at the trolley transfer point in East Derby, should transfer point in East Derby, should more than save to the people of the community the amount of his salary during the year by the accidents and the loss of property he prevents. This, too, without taking into account the fact that he will probably be the means of saving several lives by his enforcement of the traffic rules.—Ansonia Senting!

The more you contempiate the word the more it grows on you. The "de" in it intimates that it is the reverse of evolution, it is the process of evolving turned backward. The "devil" in it means just that—there is the devil in it.

Evolution is the term we apply to the whole of that upward swing of all creation, the growth of the entirety of all living things. Devilution would mean the opposite.

The most striking instance of devilution in the history of the race is war.

In recent address Rev. C. F. Carter declares the compensation act right-oous "because loss by accident is part of production cost." As things are actually and legally, in this state, ho is correct. Perhaps he is right eithern and those who take that point of Printing office under Taft and Roose-veit, both supposed to be Republicans. The reduction of Republicans salaries ought to have come months ago. Much praise is due the Public Printer for his politic consideration and generous of living for plainly the ultimate consideration. In recent address Rev. C. F. Carter
